Signs You Need Electrical Repair

- Your house is the only one on the block without power
- Your appliances turn off randomly
- You have dead light switches
- You have dead outlets
- You experience frequent circuit breaker trips
- You have dim or flickering lights

Electrical Repairs

We offer electrical repair options on every project to try and fit everyone's budget. For instance: a job like a troubleshoot/repair call for outlets not working we will offer 3

different options:

- **Band-aid fix**, where we locate the problem and fix it. (30-day warranty)
- **Circuit restoration**, where we remove all the devices on the faulty circuit, repair all connections, and replace devices with new ones. (3 year warranty)
- **Premium Circuit Restoration**, where we do the same as above, but include an arc fault breaker which protects the circuit from starting a fire if it should ever fail (5 year warranty).

Electrical Safety Inspection

A safety inspection provides a thorough examination of your entire electrical system, and is important for the integrity of the home and everyone in it. After the electrical safety inspection is complete, we provide a detailed checklist for items that need immediate attention, and recommendations for improvements or upgrades. It is recommended to get an electrical safety inspection when a home is more than 30 years old, has a major renovation, when you buy a home, or when adding a new appliance.
